ABBREVIATED INSTRUCTIONS FOR BASIC COMPILER OPERATION
(ASSUMES DISKETTE 1 CONTAINS BASCOM AND L80)
(DISKETTE 2 CONTAINS BASLIB)
(AND DISKETTE 3 CONTAINS YOUR PROGRAM SAVED WITH 'A' OPTION)
(FOR EXAMPLE   SAVE "PROG/BAS",A   )

ONE DRIVE	MOUNTED DISKETTES		TWO DRIVES
1) (ENTER DOS)	(ANY TRSDOS 2.3 DISK) OR NEWDOS 2.1		(ENTER DOS)

2) BASCOM   (1)   (1,3)   BASCOM=PROG
3) =PROG   (3)
(STEPS 2 AND 3 TEST FILE TO SEE WHETHER IT CAN BE COMPILED WITHOUT ERROR)

4) BASCOM   (1)   (1,3)   BASCOM PROG,PROG=PROG
5) PROG,PROG=PROG (3)
(STEPS 4 AND 5 COMPILE THE PROGRAM AND CREATE A LISTING AND RELOCATABLE
FILE ON DISK 3)

6) L80   (1)   (1,3)   L80 PROG
7) PROG   (3)
(THESE STEPS LINK FILE AND LOAD IT INTO MEMORY)

8) BASLIB-S   (2)   (2)   BASLIB-S
(THIS COMMAND SEARCHES THE SYSTEM LIBRARY FOR UNDEFINED REFERENCES)

9) -G   (2)   (2)   -G
(THIS EXECUTES THE PROGRAM)

10) L80   (1)   (1,3)   L80 PROG
11) PROG   (3)
12) BASLIB-S   (2)   (2)   BASLIB-S
(SEE STEPS 6-8 EXPLANATION FOR DESCRIPTION)

13) PROG-N-E   (3)   (3)   PROG-N-E
(THIS SAVES PROG/CMD ON DISKETTE 3)

Note- If you want to shorten the work you can omit steps 2 and 3
(the test steps) and steps 9,10,11,12 (the trial execution steps).

* Can do PROG = PROG and suppress PROG/LST)
which you will want to do for large
programs.
